

**AMENDMENTS TO THE CLAIMS**

**This listing of claims will replace all prior versions and listings of claims in the application:**

**LISTING OF CLAIMS:**

1. (currently amended): A resin composition comprising 3 to 80 parts by weight of a resol [[type]] phenolic resin (B1) or 3 to 150 parts by weight of a polyhydric phenol (B2), based on 100 parts by weight of a copolymer (A) of an epoxy group-containing monomer and an  $\alpha$ -olefin.

2. (withdrawn): A resin composition comprising the copolymer (A) and the resol type phenolic resin (B1) of Claim 1 and an olefin-based polymer (C), wherein the content of (B1) is from 3 to 80 parts by weight based on 100 parts by weight of the total amount of (A) and (C), and the content of (C) is from 1 to 700 parts by weight based on 100 parts by weight of (A).

3. (withdrawn): A resin composition comprising the copolymer (A) and the polyhydric phenol (B2) of Claim 1 and an olefin-based polymer (C), wherein the content of (B2) is from 3 to 150 parts by weight based on 100 parts by weight of the total amount of (A) and (C), and the content of (C) is from 10 to 1000 parts by weight based on 100 parts by weight of (A).

4. (withdrawn): A resin composition comprising the copolymer (A) and the resol type phenolic resin (B1) of Claim 1 and a carboxylic acid compound (D), wherein the content of (B1) is from 3 to 80 parts by weight based on 100 parts by weight of (A), and the content of (D) is from 0.1 to 30 parts by weight based on 100 parts by weight of the total amount of (A) and (B1).

5. (withdrawn): A resin composition comprising the copolymer (A) and the resol type phenolic resin (B1) of Claim 1 and an olefin-based polymer (C) and a carboxylic acid-based compound (D), wherein the content of (B1) is from 3 to 80 parts by weight based on 100 parts by weight of the total amount of (A) and (C), the content of (C) is from 1 to 700 parts by weight based on 100 parts by weight of (A), and the content of (D) is from 0.1 to 30 parts by weight based on 100 parts by weight of the total amount of (A), (B1) and (C).

6. (currently amended): The resin composition according to Claim 1, wherein the resol [[type]] phenol resin (B1) is a resol type alkylphenol resin.

7. (withdrawn): The resin composition according to Claims 3, wherein the resol type phenol resin (B1) is a resol type alkylphenol resin.

8. (withdrawn): The resin composition according to Claims 4, wherein the resol type phenol resin (B1) is a resol type alkylphenol resin.

9. (original): A powder of the resin composition according to Claim 1, having an average particle size of 30 to 1000  $\mu\text{m}$ .

10. (original): A laminate (I) manufactured by laminating a layer (1) made of the resin composition according to Claim 1 and a layer (2) made of polyurethane.

11. (original): A laminate (II) manufactured by laminating a layer (1) made of the resin composition according to Claim 1 and a layer (3) made of an olefin-based or styrene-based thermoplastic elastomer.

AMENDMENT UNDER 37 C.F.R. § 1.111  
U.S. Appln. 10/021,351  
ATTORNEY DOCKET NO. Q67751

12. (currently amended): A laminate (III) manufactured by laminating a layer (2) made of polyurethane, [[and]] a layer (3) made of an olefin-based or styrene-based thermoplastic elastomer [[via]] and a layer (1) made of the resin composition according to Claim 1, wherein the layer (1) is located between the layer (2) and the layer (3).

13. (original): The laminate according to Claims 10, wherein the layer (1) is a layer produced by a powder molding method.

14. (original): A method for producing the laminate according to Claim 10, comprising producing a layer (1) by a powder molding method.
